PROFESSIONAL SUMMARY

Full-Stack Developer with proven track record delivering high-impact, scalable applications across **healthcare, e-commerce, and food delivery domains**. Expert in **MERN stack, Spring Boot, React Native, and Android** with deep specialization in **multi-tenant architectures, secure JWT-based authorization systems, and performance optimization**. Quantifiable achievements: 30+ production APIs (500+ req/sec), 40% performance boost, 35% latency reduction, 95% security improvement, 30% crash elimination. Committed to architecting secure, scalable, and maintainable systems.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript (ES6+), Python, SQL
- **Frontend:** React.js, React Native, HTML5, CSS3, Material UI, Tailwind CSS
- **Backend:** Node.js, Express.js, Spring Boot, Hibernate, JPA, RESTful APIs
- **Mobile:** Android (Java/XML), React Native, Material Design, RecyclerView, ConstraintLayout
- **Databases:** MongoDB, PostgreSQL, MySQL, SQLite, MS SQL Server
- **Tools:** Git, Docker, Postman, IntelliJ IDEA, VS Code, Android Studio, Gradle
- **AI Development Tools:** WindSurf, Cursor, ChatGPT, Claude AI, GitHub Copilot, WarpAI

PROFESSIONAL EXPERIENCE

- **Samishti Infotech Pvt. Ltd.** Pune, India
Associate Consultant - Development Oct 2025 – Present
 - Contributing to a healthcare and wellness platform using **MERN stack** and React Native with 1,000+ active users.
 - Developing and maintaining **15+ RESTful APIs** for patient management, appointment scheduling, and health analytics.
 - Implementing **JWT-based authentication** with role-based access control for multiple user types (Patients, Doctors, Admins).
 - Working on **multi-tenant database architecture** ensuring data isolation and security across healthcare facilities.
 - Collaborating with frontend and backend teams to integrate APIs and improve application performance.
 - Participating in code reviews, testing, and deployment processes to ensure code quality and reliability.
- **Digisure Technologies Pvt. Ltd.** Lucknow, India
Junior Software Developer Intern Feb 2025 – Aug 2025
 - Refactored Android application architecture, improving load time by **40%** and UI rendering by **35%**.
 - Developed **20+ Android screens** using ConstraintLayout, RecyclerView, and Material Design.
 - Integrated REST APIs using Retrofit with robust error handling, reducing crash rate by **30%**.
- **GeeksforGeeks** Bengaluru, India
Software Development Training May 2024 – Sep 2024
 - Built high-performance REST APIs using **Spring Boot, Hibernate, and JPA**, handling **500+ req/sec**.
 - Implemented microservices following **SOLID principles** and clean architecture.
 - Secured APIs using **Spring Security + JWT** with role-based authorization.

PROJECTS

- **Aarogyam - Healthcare & Wellness Platform** Full-Stack Multi-Platform
MERN Stack, React Native, Node.js, MongoDB GitHub: Web | Backend | Mobile
 - Architected a comprehensive **healthcare and wellness platform** serving 1,000+ users with appointment scheduling, patient records, and health analytics.
 - Developed **30+ RESTful endpoints** using Node.js and Express.js for patient management, doctor scheduling, appointment booking, and medical records retrieval.

- Implemented **JWT-based authentication with 5-role RBAC system** (Patients, Doctors, Admins, Pharmacists, Support Staff) reducing unauthorized access by **95%**.
- Designed **React.js web portal** with responsive Tailwind CSS UI for patient dashboards, appointment management, medical history, and health metrics visualization.
- Built **React Native mobile application** for iOS and Android with cross-platform code sharing, achieving **40% reduction in development time**.
- Implemented **multi-tenant architecture (DB-per-tenant)** ensuring HIPAA-compliant data isolation and secure patient privacy across healthcare facilities.
- Optimized MongoDB queries and implemented caching strategies, improving API response times by **35%** and reducing server load by **25%**.

• **Inventory Management SaaS Platform**

Full-Stack Application

React 19, Spring Boot 3.2.3, PostgreSQL, Tailwind CSS

GitHub: amishashank/Inventory-Management

- Architected and built a comprehensive **multi-tenant SaaS platform** for small businesses to manage inventory, billing, and customer relationships.
- Designed **20+ RESTful endpoints** using Spring Boot with JWT authentication and Spring Security for role-based access control.
- Developed responsive React frontend with **Tailwind CSS v4** and React Router v7, featuring dashboard, product management, invoice generation, and bills tracking.
- Implemented **dynamic GST handling** with automated CGST/SGST calculation for Indian tax compliance.
- Integrated **PostgreSQL** with Spring Data JPA/Hibernate for robust data persistence and query optimization.
- Built professional invoice generation system with cart management and real-time stock tracking capabilities.

• **Food Delivery Mobile Application**

Android Native Development

Java, Android SDK, Material Design, RecyclerView

GitHub: amishashank/Food-Delivery-App

- Developed a comprehensive **food delivery platform** with location-based restaurant discovery and food browsing features.
- Built **15+ Android screens** including splash screen, onboarding, location selection, home dashboard, and user profile management using ConstraintLayout and Material Design.
- Implemented **auto-scrolling carousel** with dynamic dot indicators for promotional banners and featured restaurants.
- Created **RecyclerView-based menu display** with MenuAdapter pattern for efficient rendering of 50+ food items across multiple categories (Paneer, Broccoli, Rice, Street Food, Desserts, Beverages).
- Integrated **Bottom Navigation View** for seamless navigation between Home, Search, Cart, and Profile fragments using fragment-based architecture.
- Implemented **location dropdown** with AutoCompleteTextView for city selection and location-aware restaurant filtering.
- Utilized **Glide library** for efficient image loading and caching of food images, optimizing memory and reducing UI lag.

EDUCATION

- **Galgotias University** Uttar Pradesh, India
Master of Computer Applications (MCA) *Graduated: Oct 2023*
- **SRM University** India
Bachelor of Computer Applications (BCA) *Graduated: Oct 2020*

CERTIFICATIONS

- Complete Backend Development Program – GeeksforGeeks
- Java & SQL Certifications – HackerRank
- Enterprise Design Thinking Practitioner – IBM SkillsBuild
- Android Development Training – Certified
